DT600U DIAMOND BLADE

- Suitable for a various range of applications
- First rate cutting performance
- Exceptional service life

**LASER
WELDED**

Segmented diamond blade

About the product

Remain in full control of all processes: staying true to this motto, Klingspor managed to rise to be one of the world's first manufacturers of grinding and cutting tools. The company is now applying their extensive experience in research and development and manufacturing, their global network of distributors and their highly efficient service and logistics structure to their diamond tools.

Crimped wire wheel brush

About the product

The wire brushes made by Klingspor are used for a wide variety of machining tasks in the steel and stainless steel sector. A key benefit a wire brush holds over abrasives is the fact that the brush only works on the surface of the workpiece without changing the shape of the workpiece to be processed. This benefit is of particular importance during work on ultra-thin sheet metal.

The selection of wire brushes offered by Klingspor comprises a comprehensive range of products that are designed for the most diverse machining tasks, materials and machines.

**Axon™ Cladding
133mm Smooth**

Axon™ Cladding - Bring drama and detail to your walls with vertical lines.

- Axon™ cladding is a range of vertically grooved panels with the detail of vertical joint timber.
- Fibre cement with the charm of timber without the longevity issues of shrinking, swelling and warping to retain its look longer,
- Stepped shiplap joint on the long edges for easy installation, it can be gun nailed and cut cleanly with a circular saw using a dust-reduced fibre cement blade.
- The ideal option for contemporary upper storey and ground floor extensions and suited to modern and beachy building styles.

For further information visit jameshardie.com.au or phone 13 11 03

The beauty of clean lines
and a modern look.

Hardie™ Fine Texture Cladding

NEW Hardie™ Fine Texture Cladding

SAVE TIME

Clad and paint on the same day¹

SAVE COST

Up to 30% less than rendered brick²

SAVE COMPLEXITY

Less trades on site (no need for a renderer)

Rendered walls with chippies not brickies.

Hardie™ Fine Texture Cladding has a fine render texture embedded in the fibre cement panel, so the chippies who build your frame can also install it. It's pre-sealed and ready to paint, giving any colour a beautiful matte appearance. Plus, it's durable and lower maintenance than traditional cement render, so it stays looking great for years to come.

To find out more,
scan QR code.

© 2021 James Hardie Australia Pty Ltd ABN 12 084 558. ™ and ® denote trademark or registered mark owned by 1. Start painting the same day, as the board comes factory pre-sealed and pre-textured. 2. Comparison based on builder case studies, and modelled installation costs for a fully built and painted wall (9.0 m long x 2.4 m high + 1 x door + 1 window) using data sourced from Estimates Australia (2020).

Linea™
Weatherboards

Crisp White Linea™ Weatherboards combined with contemporary clean lines.

- The clean horizontal lines of Linea™ weatherboards work beautifully on the expansive external walls of modern architecture. and are ideal for creating a Hamptons or coastal inspired look.
- Innovative and durable, Linea™ weatherboards are resistant to shrinking, swelling and cracking and will hold paint longer than wood.
- Featuring the distinctive charm of a deep shadow weatherboard without the maintenance of timber, the unmatched thickness for fibre cement weatherboards of 16mm which also enable handy tongue and groove short ends for clean butt joints even off-stud.

For further information visit jameshardie.com.au or phone 13 11 03

SHARPLINE® ARCHITECTURAL CLADDING

Unleash your creativity and let texture take centre stage

As an innovative standing seam profile and part of the Stramit Architectural Range, SharpLine® cladding will give you a beautifully textured finish and contemporary styling for years to come.

SharpLine® cladding is a modern, versatile solution which integrates seamlessly with other building materials. Create texture using shadow and light, by playing with a wide variety of cover widths and differing rib heights. Choose to use it either as wall cladding or a roofing profile.

A visually striking profile with tall, sharp ribs and flat pans.

- Choose from 25mm and 38mm ribs to change shadow and visual line depths.
- Available in a range of cover widths from 265mm to 520mm*, using either direct or clip fix fastening systems.
- Create texture with different tray widths, plus vertical, horizontal and diagonal lines.
- Play with our 8 different tray widths.

Ask in-store about SHARPLINE® Cladding for your next project.

* Cover width will depend on rib height and fixing style.
